

[1854 - 2014]

Creative by Nature for 160 years

Since 1854, Payan Bertrand has been passionately exploring the natural world in order to offer a range of the highest-quality essential oils, extracts, and innovative molecules that are consistently used and appreciated by all the major companies in the global Flavour and Fragrance industry.

enjoy nature

Payan Bertrand has a sophisticated and flexible production facility, geared to manufacturing a wide range of premium natural ingredients:

Essential oils, concretes, resinoids, absolutes, molecular distillates, 100% natural fractions and organic ingredients.

As well as the traditional ingredients such as violet and mimosa originating from the Grasse region, Payan Bertrand continuously processes a very wide range of imported basic natural materials:

Olibanum Gum from Somalia, **Elemi** from the Philippines, **Galbanum** from Iran, **Styrax** from Turkey and Honduras, **Tonka Beans** from Brazil, **Tolu**, **Copaiba**, and **Peru Balsams** from South America, **Ambrette Seeds** from Ecuador and **Cardamom** from Guatemala, **Patchouli Leaves** from Indonesia, the finest **Keemun Tea** from China, **Elder Flowers** from Eastern Europe and **Orris Roots** from Italy – these are just a selection of the ingredients that we are expert in.

Notes

A series of horizontal dotted lines for writing notes.

Notes

A large area of dotted lines for writing notes, consisting of 30 horizontal rows of small, evenly spaced dots.

The original and historic company site in the heart of Grasse is involved exclusively with the processing of natural ingredients. Our steam distillation and solvent extraction centres together annually handle in excess of 300 tonnes of natural aromatic materials.

research & innovation

The essential oil fractionation plant provides us with consistently high-purity isolates. Payan Bertrand's R&D Analytical Division works with the latest equipments, including HPLC, Headspace sampler, GC Mass Spectrometry, MS/MS Triple quad.

Our expert technical staff follows stringent test procedures in controlling the quality and purity of our products. Each stage of the production process is rigorously checked to ensure full lot traceability.

A sample from each production batch is retained for a minimum of 5 years in a controlled-temperature environment.

Our Regulatory Department closely follows and adheres to international regulations and guidelines to ensure that our ingredients fully conform to the requirements of all the major governing bodies such as IFRA, EEC, FDA, IOFI and COSMETICS EUROPE.

All productions are manufactured in compliance with the OHSAS 18001 and HACCP (Hazard Analysis Critical Control Point) hygiene and security guidelines.

Payan Bertrand is an active member of key industry associations, including PRODAROM, S.N.I.A.A, and IFEAT.
